

Can we authorize the repairs for a vehicle that is leased by the participant?

We must first determine if the participant has a service agreement with the lessor. If there is a service agreement that would pay for the repairs, then no, we cannot authorize the repairs. If there is no service agreement, we could consider paying the cost of repairs, using the same standards as we use for vehicles which are owned by the participant. If there is a service agreement, but the participant would need to pay a deductible, we can consider payment of the deductible.
